

## INDEX TO VOLUMES 36-40

THIS INDEX lists, by author, the 42 articles and 342 abstracts which have been published in volumes 36 through 40 of the *Yearbook* (1974-1978). In addition, one subject entry and, when feasible, one location entry appear for each full article. For all entries, pagination follows the volume number. Citations one or two pages in length denote abstracts. See individual *Yearbooks* for authors and titles of those papers presented at annual meetings of the Association which have not been published as either abstracts or articles.
